## Change in Investment Pattern

The Scheme, in general, will hold all the securities that comprise the underlying Index in the same proportion as the index.

Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent

possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. However, in case of events like, Income Distribution cum capital withdrawal issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the scheme is an exchange traded fund, it will endeavor that at no point of time the scheme will deviate from the index. In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 days.

In the interest of investors, the AMC reserves the right to change the above asset allocation pattern due to corporate action activity undertaken in the underlying securities. In the event of involuntary corporate action, the fund shall dispose the security not forming part of the Underlying index within 30 days from the date of allotment/ listing.

In case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days.

Any transactions undertaken in the scheme portfolio of the Fund in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

## **B. WHERE WILL THE SCHEME INVEST?**

The corpus of the Scheme will invest in Securities which are constituents of Nifty 50 Index and in Money Market Instruments such as:

1. Equity shares of companies constituting Nifty 50 Index
2. Treasury Bills, Cash Management Bills, Certificate of Deposits (CDs), Commercial Paper (CPs), Bills Rediscounting, and other Money Market Instruments with residual maturity not exceeding 91 days as may be permitted by SEBI / RBI from time to time.
3. Any other securities / instruments as may be permitted by SEBI/ RBI from time to time, subject to regulatory approvals if any.

The Scheme does not intend to invest in derivatives, foreign securities and will not engage in securities lending and short selling.

Detailed definition and applicable regulations/guidelines for each instrument is included in Section II)

## **C. WHAT ARE THE INVESTMENT STRATEGIES?**

The Scheme will track its Underlying Index and will use a “passive” or indexing approach to endeavor to achieve scheme’s investment objective. The scheme will neither try to beat the index it tracks nor take active approach in times when markets seem to be over/under valued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Since the scheme is an exchange traded fund, the scheme will only invest in the security constituting the underlying index.

Since the scheme is an exchange traded fund, it will endeavor that at no point of time the scheme will deviate from the index.

## **NOTE ON EXCHANGE TRADED FUNDS**

ETFs are innovative products that provide exposure to an index or a basket of securities that trade on the exchange like a single stock. ETFs have a number of advantages over traditional open-ended index

funds as they can be bought and sold on the exchange at prices that are usually close to the actual intra-day NAV of the Scheme. ETFs are an innovation to traditional mutual funds as ETFs provide investors a fund that closely tracks the performance of an index with the ability to buy/sell on an intra-day basis. Unlike listed close ended funds, which trade at substantial premiums or more frequently at discounts to NAV, ETFs are structured in a manner which allows to create new units and redeem outstanding units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

ETFs are usually passively managed funds wherein subscription/redemption of units work on the concept of exchange with underlying securities. In other words, large investors/institutions can purchase units by depositing the underlying securities with the mutual fund/AMC and can redeem by receiving the underlying shares in exchange of units. Units can also be bought and sold directly on the exchange.

ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges. The structure of ETFs is such that it protects long-term investors from inflows and outflows of short-term investor. This is because the fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.

Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the Creation/Redemption of units through the in-kind mechanism the mutual fund can keep lesser funds in cash. Also, time lag between buying/selling units and the underlying shares is much lower.

ETFs are highly flexible and can be used as a tool for gaining instant exposure to the equity markets, equitising cash or for arbitraging between the cash and futures market.

#### **Benefits of ETFs**

- a. Can be easily bought / sold like any other stock on the exchange through terminals spread across the country.
- b. Can be bought / sold anytime during market hours at prices that are expected to be close to actual NAV of the Scheme. Thus, investor invests at real-time prices as opposed to end of day prices.
- c. No separate form filling for buying / selling units. It is just a phone call to your broker or a click on the net.
- d. Ability to put limit orders.
- e. Minimum investment for an ETF is one unit.
- f. Protects long-term investors from the inflows and outflows of short-term investors.
- g. Flexible as it can be used as a tool for gaining instant exposure to the equity markets, equitising cash, for arbitraging between the cash and futures market.
- h. Helps in increasing liquidity of underlying cash market.
- i. Aids low cost arbitrage between futures and cash market.
- j. An investor can get a consolidated view of his investments without adding too many different account statements as the units issued would be in demat form.

#### **Uses of ETFs**

- a. Investors with a long-term horizon: Allows diversification of portfolio at one shot thereby reducing scrip specific risk at a low cost.
- b. FPIs, Institutions and Mutual Funds: Allows easy asset allocation, hedging and equitising cash at a low cost.
- c. Arbitrageurs: Low impact cost to carry out arbitrage between the cash and the futures market.
- d. Investors with a shorter term horizon: Allows liquidity due to ability to trade during the day and expected to have quotes near NAV during the course of trading day.

### **Risks of ETFs**

- i. **Absence of Prior Active Market:** Although the units of ETFs are listed on the Stock Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.
- ii. **Lack of Market Liquidity:** Trading in units of ETFs on the Stock Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned Stock Exchange or Market Regulator, trading in the ETF Units is inadvisable. In addition, trading in the units of ETFs is subject to trading halts caused by extraordinary market volatility pursuant to 'circuit filter' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of ETFs will continue to be met or will remain unchanged.
- iii. **Units of Exchange Traded Funds May Trade at Prices Other than NAV:** Units of ETFs may trade above or below their NAV. The NAV of Units of ETFs may fluctuate with changes in the market value of a Scheme's holdings. The trading prices of units of ETF will fluctuate in accordance with changes in their NAVs as well as market supply and demand. However, given that ETFs can be created/ redeemed in Creation Units, directly with the fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.

### **TRACKING ERROR**

Tracking Error may arise due to reasons including but not limited to the following: -

- a. Expenditure incurred by the fund.
- b. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- c. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- d. Securities trading may halt temporarily due to circuit filters.
- e. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- f. Rounding off of quantity of shares in underlying index.
- g. Payout of Income Distribution cum capital withdrawal option.
- h. Disinvestments to meet redemptions, recurring expenses, Payout of Income Distribution cum capital withdrawal option etc.
- i. Execution of large buy / sell orders
- j. Transaction cost (including taxes and insurance premium) and recurring expenses
- k. Realisation of Unit holders' funds

It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in case of events like, Income Distribution cum capital withdrawal received from underlying securities, rights issue from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

The tracking difference shall be targeted to be 50 bps (over and above actual TER charged). In case the same is not maintained, it shall be brought to the notice of trustees along with corrective actions taken by the AMC, if any.

### **Portfolio Turnover**

Portfolio Turnover measures the volume of trading that occurs in a Scheme's portfolio during a given time period. The Scheme is an open-ended Exchange Traded Fund and it is expected that there may be a number of subscriptions and repurchases on a daily basis through Stock Exchange(s) or Authorised Participants and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty 50 Index. However, it will be the endeavour

of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.

Portfolio Turnover ratio of the scheme for the period October 01, 2024 to September 30, 2025 is 0.11\*.

\*Portfolio Turnover Ratio is calculated as lower of purchase or sale during the period / Average AUM for the last one year (Includes Fixed Income securities and Equity derivatives).

#### **D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?**

The performance of the scheme will be benchmarked against Nifty 50 TRI.

The corpus of Bandhan Nifty 50 ETF will be invested predominantly in almost all the stocks constituting Nifty 50 Index, in almost same weightage of the Index. The Scheme would endeavor to attain returns comparable to Nifty 50 Index, subject to the tracking error. The Benchmark has been chosen on the basis of the investment pattern/objective of the scheme and the composition of the index.

## **PART III- OTHER DETAILS**

### **A. COMPUTATION OF NAV**

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time.

All expenses and incomes accrued up to the valuation date shall be considered for computation of NAV. For this purpose, major expenses like management fees and other periodic expenses would be accrued on a day to day basis. The minor expenses and income will be accrued on a periodic basis, provided the non-daily accrual does not affect the NAV calculations by more than 1%.

Any changes in securities and in the number of units be recorded in the books not later than the first valuation date following the date of transaction. If this is not possible given the frequency of the Net Asset Value disclosure, the recording may be delayed upto a period of seven days following the date of the transaction, provided that as a result of the non-recording, the Net Asset Value calculations shall not be affected by more than 1%.

In case the Net Asset Value of a scheme differs by more than 1%, due to non - recording of the transactions, the investors or scheme/s as the case may be, shall be paid the difference in amount as follows:-

- (i) If the investors are allotted units at a price higher than Net Asset Value or are given a price lower than Net Asset Value at the time of sale of their units, they shall be paid the difference in amount by the scheme.
- (ii) If the investors are charged lower Net Asset Value at the time of purchase of their units or are given higher Net Asset Value at the time of sale of their units, asset management company shall pay the difference in amount to the scheme.

The asset management company may recover the difference from the investors.

NAV of units under the Scheme shall be calculated as shown below:

**NAV (Rs.) =**

Market or Fair Value of Scheme's investments	+	Current Assets including Accrued Income	-	Current Liabilities and Provisions including accrued expenses
--	---	---	---	---

---

### **No. of Units outstanding under Scheme**

The NAV of the Scheme will be calculated upto four decimal places and will be declared on each business day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and shall be subject to such regulations as may be prescribed by SEBI from time to time.

The Fund will also calculate intra-day indicative NAV (computed based on snapshot prices received from BSE) and will be updated during the market hours on the website of the Mutual Fund ([www.bandhanmutual.com](http://www.bandhanmutual.com)) with a delay of approximately 15 seconds. Intra-day indicative NAV will not have any bearing on the creation or redemption of units directly with the Fund by the Authorized Participants /Large Investors.

**Illustration:**

**Computation of NAV** - Assume that the Market or Fair Value of Scheme's investments is Rs. 1,00,00,000; Current asset of the scheme is Rs. 25,00,000; Current Liabilities and Provisions is Rs. 15,00,000 and the No. of Units outstanding under the scheme are 5,00,000. Thus, the NAV will be calculated as:

$$\text{NAV} = \frac{10000000 + 2500000 - 1500000}{500000} = 22.000$$

Therefore, the NAV of the scheme is Rs. 22.000

**Computation of Repurchase Price** - If the applicable NAV is Rs. 10, exit load is 2% then redemption price will be: Rs. 10\* (1-0.02) = Rs. 9.80

The Redemption Price will not be lower than 97% of the NAV.

For details on policies related to computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV, please refer SAI.

Any changes in securities and in the number of units be recorded in the books not later than the first valuation date following the date of transaction. If this is not possible given the frequency of the Net Asset Value disclosure, the recording may be delayed upto a period of seven days following the date of the transaction, provided that as a result of the non-recording, the Net Asset Value calculations shall not be affected by more than 1%.

In case the Net Asset Value of a scheme differs by more than 1%, due to non - recording of the transactions, the investors or scheme/s as the case may be, shall be paid the difference in amount as follows:-

- (i) If the investors are allotted units at a price higher than Net Asset Value or are given a price lower than Net Asset Value at the time of sale of their units, they shall be paid the difference in amount by the scheme.
- (ii) If the investors are charged lower Net Asset Value at the time of purchase of their units or are given higher Net Asset Value at the time of sale of their units, asset management company shall pay the difference in amount to the scheme.

The asset management company may recover the difference from the investors.

NAV of units under the Scheme shall be calculated as shown below:

NAV (Rs.) =

Market or Fair Value of Scheme's investments	+	Current Assets including Accrued Income	-	Current Liabilities and Provisions including accrued expenses
--	---	---	---	---

---

No. of Units outstanding under Scheme

The NAV of the Scheme will be calculated upto four decimal places and will be declared on each business day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and shall be subject to such regulations as may be prescribed by SEBI from time to time.

NAV of the Scheme shall be made available on the website of AMFI ([www.amfiindia.com](http://www.amfiindia.com)) and the Mutual Fund ([www.Bandhanmutual.com](http://www.Bandhanmutual.com)) by 11.00 p.m. on all business days. The NAV shall also be

available on the Toll Free Number -1800-300-66688/1-800-2666688 -and on the website of the Registrar and Transfer Agent CAMS (www.camsonline.com).

In case the NAV is not uploaded by 11.00 p.m it shall be explained in writing to AMFI for non adherence of time limit for uploading NAV on AMFI's website. If the NAVs are not available before the commencement of business hours on the following day due to any reason, the Mutual Fund shall issue a press release giving reasons and explaining when the Mutual Fund would be able to publish the NAV. Delay in disclosure of NAV etc. refer to SAI

During the continuous offer of the scheme, the units will be available at the applicable NAV based prices. This is the price that an investor will pay for purchase / switch in. Ongoing price for redemption (sale) /switch outs (to other schemes/plans of the Mutual Fund) by investors:

At the applicable NAV subjects to prevailing exit load. This is the price you will receive for redemptions/switch outs.

Example: If the applicable NAV is Rs. 10, exit load is 2% then redemption price will be: Rs. 10\* (1-0.02) = Rs. 9.80

The Redemption Price will not be lower than 97% of the NAV.

Disclosure to the effect that the repurchase price shall not be lower than 97% of the NAV. For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI

## **SECTION II**

### **I. INTRODUCTION**

#### **A. Definitions/interpretation**

**Refer the following link for Definitions/interpretations**

<https://bandhanmutual.com/downloads/sid>

#### **B. Risk factors**

##### **Scheme specific risk factors**

The specific risk factors related to the Scheme include, but are not limited to the following:

1) The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

2) The Scheme proposes to invest in equity and equity related instruments. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme(s) to make intended securities' purchases due to settlement problems could cause the Scheme(s) to miss certain investment opportunities.

3) While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme(s) and may lead to the Scheme(s) incurring losses till the security is finally sold.

4) Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme(s) can go up and down because of various factors that affect the capital markets in general.

#### **1) Risk Factors associated with Exchange traded schemes:**

##### **a. Passive Investments:**

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

##### **b. Tracking Error Risk:**

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index, non-availability of issuances, regulatory policies and any such reasons that may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index.

“Tracking Error” is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. Tracking Error may arise including but not limited to the following reasons: -

- i) Expenditure incurred by the fund.
- ii) The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- iii) Securities trading may halt temporarily due to circuit filters.
- iv) Corporate actions such as debenture or warrant conversion, merger, change in constituents etc.
- v) Disinvestments to meet redemptions, recurring expenses, etc.
- vi) Execution of large buy / sell orders
- vii) Transaction cost (including taxes and insurance premium) and recurring expenses
- viii) Realisation of Unit holders’ funds

It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in certain events like market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. For the fund existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

## **2) Risks pertaining to transaction in units through Stock Exchange Mechanism:**

- a. **Absence of Prior Active Market:** Although the Scheme is listed on Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the Units of the Scheme would be infrequent.
- b. **Trading in Units may be Halted:** Trading in the Units of the Schemes on Stock Exchange may be halted because of market conditions or for reasons that in view of Stock Exchange or SEBI, trading in the Units of the Schemes are not advisable. In addition, trading of the Units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange and SEBI ‘circuit filter’ rules. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of the Units of the Schemes will continue to be met or will remain unchanged.
- c. **Lack of Market Liquidity:** The Scheme may not be able to immediately sell certain types of illiquid Securities. The purchase price and subsequent valuation of restricted and illiquid Securities may reflect a discount, which may be significant, from the market price of comparable Securities for which a liquid market exists.
- d. **Units of the Schemes May Trade at Prices Other than NAV:** The Units of the Schemes may trade above or below their NAV. The NAV of the Schemes will fluctuate with changes in the market value of the holdings of the Schemes. The trading prices of the Units of the Schemes will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Schemes. However, given that Units of the Schemes can be created and redeemed in Creation Units directly with the Fund, it is expected that large discounts or premiums to the NAV of Units of the Schemes will not sustain due to arbitrage opportunity available.
- e. **Regulatory Risk:** Any changes in trading regulations by Stock Exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.

**3) Risk of Substantial Redemptions:** Substantial Redemptions of Units within a limited period of time could require the Schemes to liquidate positions more rapidly than would otherwise be desirable, which could adversely affect the value of both the Units being Redeemed and that of the outstanding Units of the Schemes. The risk of a substantial Redemption of the Units may be exacerbated where an investment is made in the Schemes as part of a structured product with a fixed life. Please also refer to

the sections on 'right to limit Redemptions' and 'suspension of Purchase / Redemption / switch of Units' in the Statement of Additional Information. Regardless of the period of time in which Redemptions occur, the resulting reduction in the NAV of the Schemes could also make it more difficult for the Schemes to generate profits or recover losses. The Trustee, in the general interest of the Unit holders of the Schemes offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be Redeemed on any Working Day depending on the total "Saleable Underlying Stock" available with the Fund.

**4) Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

**5) Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

**6) Credit Risk:** In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down.

**7) Liquidity Risk:** Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.

**8) Other Risk:** In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

### C. Risk mitigation strategies

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt and equity markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in equity and debt and designed risk management strategies, which are embedded in the investment process to manage such risks.

### Risk associated with Debt Investment

Risk Description	Risk Mitigants/management strategy
<p><b>Market Risk</b></p> <p>As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p>	<p>In a rising interest rates scenario the Fund Managers will endeavor to increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity will be increased thereby mitigating risk to that extent.</p>

<b>Risk Description</b>	<b>Risk Mitigants/management strategy</b>
<p><b>Liquidity or Marketability Risk</b></p> <p>This refers to the ease with which a security can be sold at or near to its valuation Yield-To-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.</p>	<p>The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The fund will however, endeavor to minimise liquidity risk by investing in securities having a liquid market.</p>
<p><b>Credit Risk</b></p> <p>Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.</p>	<p>A traditional SWOT analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.</p>
<p><b>Reinvestment Risk</b></p> <p>This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p>	<p>Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.</p>

#### **Risks associated with Equity investment**

<b>Risk Description</b>	<b>Risk Mitigants/management strategy</b>
<p><b>Market Risk</b></p> <p>The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme. The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.</p>	<p>Market risk is a risk which is inherent to an equity scheme. The fund seeks to control such risk by investing in such stocks having strong fundamentals, sound financial strength and superior quality of management and highly liquid papers.</p>

<b>Risk Description</b>	<b>Risk Mitigants/management strategy</b>
<b>Liquidity risk</b>	
The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.	The fund seeks to control such risk by investing in such stocks having strong fundamentals, sound financial strength and superior quality of management and highly liquid papers. The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.

4. Derivatives:

Futures are exchange-traded contracts to sell or buy financial instruments for future delivery at an agreed price. There is an agreement to buy or sell a specified quantity of financial instruments on a designated future date at a price agreed upon by the buyer and seller at the time of entering into a contract. To make trading possible, the exchange specifies certain standardized features of the contract. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

- a. Option is a contract which provides the buyer of the option (also called holder) the right, without the obligation, to buy or sell a specified asset at the agreed price on or upto a particular date. For acquiring this privilege, the buyer pays premium (fee) to the seller. The seller on the other hand has the obligation to buy or sell specified assets at the agreed price and for this obligation he receives premium. The premium is determined considering a number of factors such as the market price of the underlying asset/security, number of days to expiry, risk free rate of return, strike price of the option and the volatility of the underlying asset. Option contracts are of two types viz:
- b. Call Option - The option that gives the buyer the right to buy a specified quantity of the underlying asset at the strike price is a call option. The buyer of the call option (known as the holder of call option) can call upon the seller of the option (writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry of the option.

The seller (writer of the option) on the other hand has the obligation to sell the underlying asset if the buyer of the call option decides to exercise his option to buy.

- c. Put Option - The right to sell is called put option. A Put option gives the holder (buyer) the right to sell a specified quantity of the underlying asset at the strike price. The seller of the put option (one who is short Put) however, has the obligation to buy the underlying asset at the strike price if the buyer decides to exercise his option to sell.

**PAN with the mutual fund:**

For transactions in the schemes of Bandhan Mutual Fund, a Consolidated Account Statement, based on PAN of the holders, shall be sent by Depositories to investors holding demat account, for each calendar month on or before fifteenth day of the succeeding month to the investors in whose folios transactions have taken place during that month.

Due to this regulatory change, AMC has now ceased sending account statement (physical / e-mail) to the investors after every financial transaction including systematic transactions.

The CAS shall be generated on a monthly basis. AMCs/ RTAs shall share the requisite information with the Depositories on monthly basis to enable generation of CAS. Consolidation of account statement shall be done on the basis of PAN. In case of multiple holding, it shall be the PAN of the first holder and pattern of holding. Based on the PANs provided by the AMCs/MF-RTAs, the Depositories shall match their PAN database to determine the common PANs and allocate the PANs among themselves for the purpose of sending CAS. For PANs which are common between depositories and AMCs, the Depositories shall send the CAS.

In case investors have multiple accounts across the two depositories, the depository having the demat account which has been opened earlier shall be the default depository which will consolidate details across depositories and MF investments and dispatch the CAS to the investor. However, option shall be given to the demat account holder by the default depository to choose the depository through which the investor wishes to receive the CAS.

In case of demat accounts with nil balance and no transactions in securities and in mutual fund folios, the depository shall send the account statement to the investor as specified under the regulations applicable to the depositories.

Consolidated account statement sent by Depositories is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, Payout of IDCW option, Reinvestment of IDCW option, systematic investment plan, systematic withdrawal plan, systematic transfer plan, bonus etc. (including transaction charges paid to the distributor) and transaction in dematerialised securities across demat accounts of the investors and holding at the end of the month. The CAS shall also provide the total purchase value / cost of investment in each scheme.

Further, a consolidated account statement shall be sent by Depositories every half yearly (September/March), on or before twenty first day of succeeding month.

Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to

distributors, during the concerned half-year period.

Investors whose folio(s)/demat account(s) are not updated with PAN shall not receive CAS. Investors are therefore requested to ensure that their folio(s)/demat account(s) are updated with PAN.

For Unit Holders who have provided an e-mail address to the Mutual Fund or in KYC records, the CAS will be sent by e-mail. However, where an investor does not wish to receive CAS through email, option shall be given to the investor to receive the CAS in physical form at the address registered in the Depository system.

Investors who do not wish to receive CAS sent by depositories have an option to indicate their negative consent. Such investors may contact the depositories to opt out.

**Other investors:**

The Consolidated Account Statement (CAS) for each calendar month shall be issued on or before fifteenth day of succeeding month to the investors who have provided valid Permanent Account Number (PAN) / PAN Exempt KYC Registration Number (PEKRN).

Due to this regulatory change, AMC has now ceased sending physical account statement to the investors after every financial transaction including systematic transactions.

The CAS shall be generated on a monthly basis. The Consolidated Account Statement issued is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, Payout of IDCW option, Reinvestment of IDCW option, systematic investment plan, systematic withdrawal plan, systematic transfer plan, bonus etc. (including transaction charges paid to the distributor) and holding at the end of the month. The CAS shall also provide the total purchase value / cost of investment in each scheme.

Further, a consolidated account statement shall be issued every half yearly (September/March), on or before twenty first day of succeeding month.

Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to distributors, during the concerned half-year period.

The CAS will be sent via email (instead of physical statement) where any of the folios consolidated has an email id or to the email id of the first unit holder as per KYC records.
